REASON FOR HOSPITALIZATION AND HOSPITAL COURSE:

The patient is a 45-year-old woman who was referred to the dual diagnosis unit by her counselor in Morgantown. She presented secondary to worsening depression and because she wanted help with cocaine use. In regards to depression this had been getting worse for the last 3-4 months and had become unmanageable over the previous 2 weeks. She reported having suicidal thoughts of overdosing and wanting to wreck her car but did not have any intent or plan to carry through with these things. In regards to the suicidal ideation this resolved and she felt safe to go on the day of discharge. In regards to cocaine use, she initially started using when she was 32 years old. As of late, her cocaine use had been once a week for the last 2-3 months. Her last cocaine use was 2 days prior to admission. She was released from jail in December 2007, where she had spent 5 years secondary to drug related legal charges. She is currently on probation. She had had 2 dirty urines lately. For her cocaine dependence as well as depression, she was placed on desipramine. She tolerated this well. There is some evidence to show the desipramine helps with cocaine cravings. She participated in groups while on the unit and attended AA and NA meetings. On the day of discharge, she is stable and is not suicidal or homicidal and is safe to go. She plans to go to stay with her mother and says it will be a safe environment for her discharge.

LABORATORY DATA: CBC within normal limits.

Electrolytes within normal limits. Creatinine 0.85. Calcium 9.6. Blood alcohol level 0. HCG negative. Urine drug screen positive for cocaine. EKG showed nonspecific T-wave abnormalities. This was obtained in the Emergency Department. QTC was 446.

DISCHARGE MENTAL STATUS EXAMINATION: The patient is alert and fully oriented. She is pleasant and cooperative during the interview. She is dressed casually and appropriately. She is well groomed. Eye contact is fair. Mild psychomotor retardation. Speech is normal in rate and volume. Thought process is linear and goal directed. No suicidal or homicidal ideation, no hallucinations or delusions. Mood is depressed and affect is flat and mood congruent. Memory is grossly intact. Concentration is adequate for conversation. Fund of knowledge is average. Thinking is abstract. Insight and judgment are fair.
